

# Internal Safety Alert

## Important reminder PPE

date of issue 12.05.2020

### FFP3 masks

To help protect our staff, we would like to remind you of some important guidance relating to FFP3 masks and PPE;

Check that you are using an FFP3 mask

If you are [working in an area](#) that requires an FFP3 mask, please verify that you have the correct mask during the donning process.

All FFP3 masks will have 'FFP3' written on them – examples are included below:

### Please do not source your own PPE

To help keep our staff and patients safe, all PPE should come through our procurement team to ensure it meets the necessary health and safety standards. Departments and teams are reminded not to source any PPE directly.

Your safety is our top priority and we expect you to put your own safety first. This means that you do not enter any clinical area to help any patients until you are completely confident that you are safe, in accordance with the Trust's [PPE guidance](#).

If you have any concerns please speak to your line manager.
